

Preparation comprising diformates and short-chain carboxylic acids

Abstract

5

The present invention relates to preparations comprising at least one diformate of the general formula $XH(COOH)_2$, where $X = Na, K, Cs, NH_4$ and at least one short-chain carboxylic acids and/or at least one salt of the short-chain carboxylic acid and/or at least one ester and/or at least one derivative of the short-chain carboxylic acid, and to the use of these preparations.
